

**NOTICE OF INTENT TO FILE PRELIMINARY APPLICATION DOCUMENT, AND REQUEST TO USE TRADITIONAL LICENING PROCESS**

By July 31, 2022, Monroe City (10 N. Main Street, Monroe, UT, 84754; (435) 527-4621) will have filed with the Federal Energy Regulatory Commission: a notice of intent to file an application for a minor license; a preliminary application document (PAD); and a request to use the traditional licensing process (TLP) for the Upper Monroe Hydroelectric Project. The project would be located near Monroe in Sevier County, Utah.

The PAD is a compilation of existing information about the project and affected resources and is available for inspection and reproduction at the Monroe City Offices (10 N. Main Street, Monroe, Utah). The applicant proposes to use the TLP because the Project is relatively small in size and proposes no changes to the current operations.

Comments on use of the TLP are due to the Commission and potential applicant no later than August 31, 2022, and must reference the project number P-1517. Any comments on use of the TLP should address: (1) likelihood of timely license issuance; (2) complexity of the resource issues; (3) level of anticipated controversy; (4) relative cost of the TLP compared to the Integrated Licensing Process; (5) the amount of available information and potential for significant disputes over studies; and (6) other pertinent factors. Respondents must submit an electronic filing pursuant to 385.2003(c) or an original and seven copies of their comments to the Secretary, FERC, 888 First Street, NE, Washington, DC 20426.
